

# Report

Chung-Yen Hung B00201015

November 5, 2014

1. Language: python (2.7)
2. library:
  - (a) telnetlib
  - (b) time
  - (c) sys
  - (d) bs4 ([www.crummy.com/software/BeautifulSoup/bs4/doc/#i](http://www.crummy.com/software/BeautifulSoup/bs4/doc/#i))
3. Finish all requests, but I have no idea about reading waterball, so I just print out "水球記錄"
4. usage: python ptt2.py <filename> (e.g python ptt2.py test.input)
5. if you want to read mail, please add <READMAIL> in test input. Then you will get mail\_i where i is index.
6. if you want to read waterball, please add <READWATERBALL> in test input. Then you will get waterball.
